

Evening Summary

Date/Time Stamp: **Tuesday, September 01, 2015 - 8:05 PM**

Weather Summary

Warming and drying trend continues today...with near normal levels for early September. Dry west/southwest flow returns to the Great Basin and there is a concern that SW winds of 15-25 mph could affect our current large fires in Idaho by this afternoon. Winds should increase to 15-30 mph (with locally higher gusts) Wednesday but humidity should be coming up about 5-10% from this afternoons levels.

These increasing SW winds are due to another low dropping in from the Pacific NW. By late Wednesday it should bring clouds to our western areas, then occasional showers and isolated wet thunderstorms Thu-Sat. Lingering cool conditions thru the end of this coming weekend.

Preparedness Levels

Current:

| | |
|-------------|---|
| Great Basin | 4 |
| National | 5 |

Great Basin Fire Activity: 7 fires for 7 acres

Large Fire Growth: 6,788 acres

Great Basin Fire Potential Summary

Overall fire danger is decreasing across most areas in the wake of the recent moist cold front. Fire danger will remain somewhat elevated across parts of Nevada and possibly SW Idaho under a drier southwest flow through mid-week
